

ALEX RIVERA

San Francisco, CA | alex.rivera@example.com | github.com/alexrivera-dev

PROFESSIONAL SUMMARY

Backend Software Engineer with 4 years of experience designing and scaling distributed web services, RESTful and gRPC APIs, and asynchronous data processing pipelines. Proven track record optimizing database queries, implementing caching layers, and maintaining 99.9% service uptime.

TECHNICAL SKILLS

Languages: Python, Go, SQL, TypeScript

Frameworks & Libraries: FastAPI, Flask, Django, SQLAlchemy, Pytest, Pydantic

Databases & Storage: PostgreSQL, Redis, DynamoDB

Infrastructure & Tools: Docker, Kubernetes, AWS (EC2, S3, RDS), GitHub Actions, Prometheus, Grafana

WORK EXPERIENCE

Senior Backend Engineer | DataFlow Systems | 2023 - Present

- Architected and deployed an ingestion microservice using FastAPI and Redis Pub/Sub, processing over 12 million events per day with p99 latency under 45ms.
- Optimized PostgreSQL database access patterns and added strategic B-tree and composite indexing, cutting average analytical query execution times by 42%.
- Integrated structured distributed tracing and OpenTelemetry across 8 microservices, decreasing Mean Time to Resolution (MTTR) during incident triage from 35 minutes to 12 minutes.
- Spearheaded the team's automated testing initiative, boosting pytest integration coverage from 58% to 88% and eliminating production release rollbacks over two consecutive quarters.

Software Engineer | CloudScale Solutions | 2021 - 2023

- Developed customer-facing REST APIs using Python and Flask backed by PostgreSQL and Celery background task workers.
- Built rate-limiting and token bucket authentication middleware using Redis, mitigating abusive API scraping by 95%.
- Containerized legacy backend monolith services using Docker and orchestrated deployments on AWS Elastic Container Service (ECS).
- Mentored 2 junior software engineers in code reviews, API versioning practices, and database migration safety.

EDUCATION

Bachelor of Science in Computer Science

University of California, Davis (2017 - 2021)

Relevant Coursework: Distributed Systems, Operating Systems, Database Management Systems, Algorithms.
